- Software Troubleshooting
- Independent, or Teamed Work
- Customer Service
- Training & Coaching Experience

Experience

Freelance Web Development

Client: Evangeline Gentle (musician) 01/22

Lost Wordpress theme rebuild. Created new custom WP theme with the original look. Implemented page/post/archive templates, primary/mobile navigations, widget area, functions.php etc. Got client back up and running, editing their own content.

Client: Public Energy Performing Arts Inc. 04/21 – 05/21

WCAG 2.1 Level AA standard remediation. Color contrast audit, HTML refactoring, img alt retrofit, mobile responsiveness, manual testing screen reader and keyboard only navigation.

Market Hall Performing Arts Centre Inc.
Box Office & Marketing Coordinator 06/2013 - 03/20

- Web Content Editing, Box Office Management, Front Desk, In-Bound Telephone Sales, Poster Design, Live Event Check In, Sales Reporting, Training support staff

Aditya Birla Minacs

Performance Coach 11/08 – 08/09

- Providing inbound phone-based software support for Apple products. I was hired as a Performance Coach after one year as an agent. I completed call evaluations (and follow up meetings) for a team of 10 agents and was there to help overcome difficulties in learning procedures and troubleshooting steps.

Education

Juno College of Technology

- Web Development Bootcamp 2021
- Intro to Web Dev Intensive Course 2021

Trent University

- Bachelor of Arts 2009-2013
  - Canadian Studies

Projects

Out Of Context (REACT, JSX, AXIOS, SCSS)
Search a movie title and get GIFs representing themes from the movie. Worked as a team of four developers.

Infinity Corkboard (REACT, JSX, REST API, CSS)
Displays 4x4 grid of photos from NASA's API. User can click and change desired images in place.

Weather Scout (HTML, JS, REST API, SCSS)
Search by city to get same day or forecast weather data. Paired programming project.

Delicious (HTML, JS, REST API, SCSS)
A multi-page PSD conversion project for a fictional restaurant chain.
